The Boston Groundwater Trust was established by the Boston City Council to monitor groundwater levels in sections of the City where the integrity of building foundations is threatened by low groundwater levels and to make recommendations for solving the problem. In FY 2009, we continued to make progress on these efforts.

The Trust is an active participant in the quarterly meetings of the City-State Groundwater Working Group. All Working Group meetings open with a review and analysis of the latest readings from our network of more than 800 observation wells that measure groundwater levels throughout the areas of concern in the City.

The data generated from our well network has led to the identification of causes of low water readings and to their repair by our partners in the Working Group. The Boston Water and Sewer Commission has made repairs in Back Bay, Beacon Hill, and the South End that have led to rising levels. In the North End and Back Bay, the Massachusetts Turnpike Authority has worked to repair leaking structures identified with the help of well data. MWRA has used the data to identify potential leaks that it is addressing in East Boston. In addition, we continue to work with the MBTA on the implementation of solutions to the low water levels in the South End near Back Bay Station. As the year ended, DCR was close to completing a connection that will bring water pumped from the Storrow Drive tunnel to recharge galleries installed by BWSC along Back Street in the Back Bay.

The Trust's work at addressing the groundwater problem can only be effective with the cooperation of many others. In addition to the Trust's partners on the Working Group, the Boston Redevelopment Authority has made sure that groundwater issues are considered by every project that goes through the Article 80 development review process. The Inspectional Services Department and the Zoning Board of Appeals have been very diligent in making sure that all qualifying projects comply with the requirements of the Groundwater Conservation Overlay District. The BWSC has been very helpful in determining that the required recharge systems are properly sized and designed. To date nearly 150 recharge systems have been approved through the GCOD process, and more than 50 have been installed and are directing rainfall into the ground rather than the sewer system.

Through the City's requirement that any groundwater observation wells installed for a project in the public way be offered to the Trust when no longer needed for the original purpose, the Trust was able to add new wells to our network in the Fenway and West End. Other wells have been promised to the Trust and should be added to the network over the next year.

Public communication about groundwater is an important part of the Trust's role. The Trust's primary means of communication is our website, www.bostongroundwater.org, which is used as a resource by many people (we average over 100 discrete visitors a day) concerned about the issue. This year we added approximate rim elevations to the site, allowing users to understand the relationship between the elevation of the sidewalk and the location of groundwater. We have added information on the importance of the elevation at which pilings are cut off and have posted cutoff elevations where available for the Back Bay and Beacon Hill. We are in the process of gathering that information for other neighborhoods and will post it as the research continues. We also added a listing of the newest postings to the website so that visitors can easily find any new information. Most importantly, we continue to post well readings within a day or two of when they are taken.

The success of the Trust's efforts would not be possible without the support of the Mayor and the City Council. Once again in FY2009, the Trust's funding request was approved by the City. In addition, the Trust received a \$25,000 grant from the BWSC. The Trust's operations for the year were once again conducted within its operating budget.

The Trust's success is also predicated on the efforts of our 13 trustees, who serve without compensation. In recognition of the importance of the groundwater issue in that neighborhood, this year the Trust expanded its board by adding a representative nominated by the President of the North End Neighborhood Council. The trustees meet bimonthly and review all operations of the Trust, setting policy and providing guidance for the staff. Also critical to the Trust's success are the five volunteer members of the Technical Advisory Committee. The committee meets regularly to help the Trust to interpret the results of its well readings and develop strategies for addressing problems.

While important strides have been made in addressing groundwater problems, it is important to remember that the wood piling supported structures that represent so much of Boston's history will always be vulnerable to lowered groundwater levels. All of us who are concerned about Boston must remain ever vigilant and must continue to monitor levels, repair leaking infrastructure, assure that new projects cannot cause drawdowns, and recharge rainwater into the ground so that these buildings, located in almost all of Boston's in-town neighborhoods, can continue to help define this special city.

Elliott Laffer Executive Director

Accountants' Review Report

To the Board of Trustees of The Boston Groundwater Trust Boston, Massachusetts

We have reviewed the accompanying statement of financial position of The Boston Groundwater Trust as of June 30, 2009 and 2008, and the related statements of activities and cash flows for the years then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of The Boston Groundwater Trust.

A review consists principally of inquiries of Trust personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

Respectfully submitted,

Respectfully submitted,

Raphael and Raphael LLP Certified Public Accountants

Boston, Massachusetts September 14, 2009

Notes to Financial Statements June 30, 2009 and 2008 SEE ACCOUNTANTS' REVIEW REPORT

NOTE 1 - ORGANIZATION:

The Boston Groundwater Trust was established as a trust in Massachusetts on July 18, 1986 under the custodianship of the City of Boston. The Trust's mission is to serve the public interest by re-establishing and maintaining a system for monitoring groundwater levels in parts of the City of Boston. It achieves this by engaging engineers, contractors and other professionals to reactivate existing wells and install new observation wells as well as collect, manage, publish and analyze data derived from old and new observation wells.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES:

Basis of Accounting

The financial statements of the Trust are prepared on the accrual basis of accounting, under which revenues are recognized when earned and expenses are recognized when incurred. This is different from the cash basis of accounting, under which revenues are recognized when cash is received and expenses are recognized when cash is disbursed.

Basis of Presentation

Financial statement presentation follows the recommendations of the Financial Accounting Standards Board in its Statement of Financial Accounting Standards (SFAS) No. 117, Financial Statements of Notfor-Profit Organizations. Under SFAS No. 117, the Trust is required to report information regarding its financial position and activities according to three classes of net assets: unrestricted net assets, temporarily restricted net assets, and permanently restricted net assets.

Cash and Cash Equivalents

Cash and cash equivalents are held in banks and money market mutual funds, and consist of highly liquid investments with a maturity when purchased of twelve months or less.

On March 26, 2009, the Trustees voted to create an unrestricted reserve fund for the following uses: groundwater research; network upgrading; contingency for technical assistance. The funds are currently held in 100% FDIC insured Certificates of Deposit.

Accrued Expenses

Accrued expenses include current period labor, installation and monitoring expenses paid after the balance sheet date.

Notes to Financial Statements June 30, 2009 and 2008 SEE ACCOUNTANTS' REVIEW REPORT

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES - Continued:

Grants, Contracts and Deferred Revenue

The Boston Groundwater Trust receives substantially all grant and contract revenue from The City of Boston and its independent agencies, the U.S. government, and the Commonwealth of Massachusetts. The Trust records grant/contract revenue as deferred revenue until it is expended for the purpose of the grant/contract, at which time it is recognized as revenue.

Contributions

Contributions received are recorded as unrestricted, temporarily restricted, or permanently restricted support, depending on the existence and/or nature of any donor restrictions. The Boston Groundwater Trust has not received any contributions with donor-imposed restrictions that would result in temporarily or permanently restricted net assets.

Contributed Services and Facilities

The thirteen Trustees of The Boston Groundwater Trust contribute their services to assist in maintaining the various programs of the Trust. Additionally, Trust receives rent free office space and use of business equipment for one of its employees. The value of these contributions has not been recorded on the accompanying financial statements since the services do not meet the criteria for recognition.

Other Revenues

Interest income is recognized when earned.

Income Taxes

The Trust is a not-for-profit organization that is exempt from income taxes under section 501(c)3 of the Internal Revenue Code.

Use of Estimates

Management uses estimates and assumptions in preparing financial statements. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities, and the reported revenues, gains, support, expenses and losses. Actual results could differ from those estimates.

Notes to Financial Statements June 30, 2009 and 2008 SEE ACCOUNTANTS' REVIEW REPORT

NOTE 3 - SUMMARY OF GRANTS/CONTRACTS FUNDING:

The Boston Groundwater Trust was primarily funded through the following grants and contracts for the year ended June 30, 2009:

Funding Source	Grant Contract Period	Total Grant/ Contract	Recognized Support	
City of Boston:				
The Environment Department	07/01/08-06/30/09	\$169,373	\$169,373	
City of Boston Independent Agencies:		25,000		
Boston Water and Sewer			25,000	
Total Grants and Contracts			\$194,373	

The Boston Groundwater Trust was primarily funded through the following grants and contracts for the year ended June 30, 2008:

Funding Source	Grant Contract Number	Grant Contract Period	Total Grant/ Contract	Recognized Support
City of Boston:				
The Environment Department		07/31/07-06/30/08	\$164,440	\$164,440
Lenox Hotel			3,500	3,500
City of Boston Independent Agencies:				
Boston Water and Sewer			25,000	25,000
Total Grants and Contracts				\$ 192,940

Notes to Financial Statements June 30, 2009 and 2008 SEE ACCOUNTANTS' REVIEW REPORT

NOTE 4 - CONCENTRATION OF CREDIT RISK:

The Corporation maintains cash balances which at times exceed federally insured amounts.

The Boston Groundwater Trust receives substantially all grant and contract revenue from The City of Boston and its independent agencies, the U.S. government, and the Commonwealth of Massachusetts.

NOTE 5 - RETIREMENT PLAN:

The Trust has a discretionary retirement plan under Section 408(K) of the Internal Revenue Code. Under the plan and at its discretion, the Trust contributes 3% of gross earnings to eligible employees who are at least twenty-one years old and have completed at least 3 years of service in the preceding five years. Employees are 100% vested upon participation. The Trust's contribution to the plan totaled \$3,983 and \$3,870 as of June 30, 2009 and 2008, respectively.
